

Ava

THE DIY STORE AUDIT KIT
SELF-SERVE · SIDEKICK-POWERED
BY AVANA

FIND EVERY LEAK. SUPERCHARGE YOUR STORE.

AUDIT YOUR OWN STORE. LIKE WE WOULD.

The exact questions we ask when we audit a fashion brand turned into copy-paste prompts for Shopify's built-in AI, Sidekick. Find your revenue leaks, your margin bleed, your broken data, and your retention gaps. Sidekick can even execute many of the fixes for you.

AVA · BY AVANA

SCORE EACH ONE

WORKS.

ONE HONEST NOTE ON ACCURACY

Sidekick samples large catalogs (often ~250 products at a time) because of data limits. Where that happens, treat the result as **directional** the pattern is real even if the exact count isn't. For a precise count, export your full catalog as CSV (Products → Export → All products). We flag every prompt where this matters.

& CART RECOVERY.

PASTE INTO SIDEKICK

For full-year 2025, what percentage of checkout sessions were abandoned, and how many sessions is that? Using my 2025 average order value, estimate the total revenue value of those abandoned checkouts, and estimate how much I could recover at a conservative 10% recovery rate.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

Do I have an active abandoned-checkout recovery flow (email or SMS)? When was it last edited, is it enabled, and how many recovery messages does it send? If I have more than one cart or checkout flow, tell me whether they overlap and might be firing on the same customer at once.

[**FIX**] If Sidekick offers to build or fix the flow open a new chat named "Fix · Checkout recovery" and do it there, so you can return to that thread to test and refine the sequence.

WHAT TO LOOK FOR

WHAT TO DO

SCORE · CHECKOUT & CART RECOVERY

Flow active, sequenced, no overlap, abandonment recovering?

— / 10

& CONVERSION.

PASTE INTO SIDEKICK

For 2025, walk me through my conversion funnel stage by stage: what percentage of sessions reached add-to-cart, reached checkout, and completed a purchase? What's my overall conversion rate? Tell me which single stage has the biggest drop-off.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

Compare my checkout sessions originating from collection pages and product pages over the last few months. Have they dropped sharply versus the prior period? Are there any sudden week-over-week declines in add-to-cart or checkout sessions from specific regions or page types that started recently?

WHY THIS MATTERS

A sharp, recent drop in checkout sessions from collection/product pages often means a **theme update or navigation change broke something** a buy button, a link, a mobile layout. This is urgent and fixable, and it can crater conversion overnight.

WHAT TO LOOK FOR

WHAT TO DO

SCORE · FUNNEL / CONVERSION

Healthy add-to-cart rate, no broken-funnel red flags?

— / 10

MARGIN.

PASTE INTO SIDEKICK

In 2025, what total dollar amount did discounts reduce my gross sales by, and what percentage of gross sales is that? Break it down by discount code so I can see which codes drove the most reduction.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

For my most-used discount codes, what is the average order value of orders that used a discount versus orders that didn't? Are discounted orders bringing in new customers, or mostly being used by existing/returning customers who already buy from me?

[**FIX**] If you decide to retire or restructure a code open a new chat named "Fix · Discount [code]" so the change is isolated and reversible.

WHAT TO LOOK FOR

WHAT TO DO

SCORE · DISCOUNT MARGIN

Discounts targeted, incremental, not subsidizing loyal buyers?

— / 10

& ATTRIBUTION.

PASTE INTO SIDEKICK

For 2025, break down my sessions and revenue by traffic source: direct, social, search, paid, email, referral. How many paid sessions did I have and what did they convert at? Does the paid number look suspiciously low compared to my actual ad activity?

WHAT TO LOOK FOR

WHAT TO DO

utm_source

utm_medium

& FIT.

PASTE INTO SIDEKICK

In 2025, what was my total dollar value of returns and how many units were returned? Which specific products drove the most returns by dollar value and by unit count? Is my return rate high or low relative to fashion benchmarks?

WHAT TO LOOK FOR

WHAT TO DO

& SEO.

PASTE INTO SIDEKICK

How many of my products are missing a meta title, a meta description, or both? Give me the exact count for each and what percentage of my total catalog that is.

[**FIX**] If Sidekick offers to write metadata open a new chat named "Fix · Meta titles" and work through bestsellers there. Keep it as its own thread so you can batch through the catalog over multiple sittings.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

How many of my products have descriptions under 150 words, and how many under 50 words? Show me the five shortest descriptions in my catalog.

SAMPLING NOTE

Sidekick may scan only ~250 products. If the sample shows ~99% under 50 words, assume it's catalog-wide. Confirm with a CSV export.

WHAT TO LOOK FOR

WHAT TO DO

SCORE · PRODUCT DATA & SEO

Metadata present, descriptions rich and searchable?

— / 10

& GEO VISIBILITY.

`yourstore.com/robots.txt`

SCORE · AI / GEO VISIBILITY

Crawlers allowed, schema valid, brand surfaces in AI search?

— / 10

& LIFECYCLE.

PASTE INTO SIDEKICK

List my active email automation flows grouped by type: welcome, abandoned cart, browse abandonment, post-purchase, win-back. For each, show open rate, click rate, and unsubscribe rate, and compare to fashion benchmarks (automations: ~40-55% open, 3-6% click, under 0.5% unsubscribe).

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

Compare my active flows against the standard DTC fashion set: 3-5 email welcome series, 3-step abandoned cart, abandoned checkout, browse abandonment, a 3-4 email post-purchase series (thank you, care/styling, cross-sell, review request), and a 2-3 email win-back. Which am I completely missing or only partially running?

[**FIX**] Build each missing flow in its own chat "Fix · Post-purchase series," "Fix · Win-back," etc. One flow per thread so you can refine each without tangling them together.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

What is my returning customer rate, and what is the average lifetime value of repeat customers (2+ orders) versus my overall average order value? Roughly how much is it worth to convert a first-time buyer into a second purchase?

WHAT TO LOOK FOR

WHAT TO DO

HYGIENE.

PASTE INTO SIDEKICK

Summarize tag usage across my catalog. How many unique tags exist? Which are used on only 1-2 products? Any products with no tags? Flag duplicate tags from inconsistent casing (e.g. "earrings" vs "Earrings"), misspelled tags, and leftover promo tags like "25% off" or "BLACK FRIDAY."

SAMPLING NOTE

For 100% coverage, export all products as CSV and audit the tag column there. The sample still reveals the patterns.

WHAT TO LOOK FOR

WHAT TO DO

PASTE INTO SIDEKICK

Review my collection structure: how many collections exist and how many products in each? Flag empty collections, internal/operational collections that shouldn't be customer-facing, stale promo collections, duplicate or overlapping collections, and any two collections sharing the same ID. Separately, are there duplicate or near-identical product titles in my catalog?

WHAT TO LOOK FOR

WHAT TO DO

SCORE · CATALOG HYGIENE

Tags consistent, collections lean, no duplicates?

— / 10

SEGMENTATION.

PASTE INTO SIDEKICK

How many customer segments do I have and what are they based on?
Am I missing any of these high-value types: product-category buyers (jewelry vs apparel), lifecycle segments (new 0-90 days, active, lapsed 6-18 months, lost 18+), and new-vs-repeat beyond simple order count? Also: what percentage of my customers have no country or location data?

WHAT TO LOOK FOR

WHAT TO DO

SCORE · CUSTOMER SEGMENTATION

Lifecycle + category segments built, location data complete?
